

## Business Services - System Security Assessments Rates (July 2009)

Page Categories	Description	Billable Unit	Service Rate
<b>System Security Assessments</b>			
<b>Quick Hit Assessment</b>	A quick summary of vulnerabilities in the Customer's network. BCCS will try to assess what a malicious person can do inside the Customer's network in a short period of time.		TBD
<b>Internal Assessment</b>	An evaluation of network security from an internal perspective. BCCS will perform a vulnerability assessment of Customer systems and networks including servers and routers. BCCS will generally try to find ways of minimizing security risks and avoid potential security breaches within the network.	Per device	\$100.00
<b>External Assessment</b>	An evaluation of network security from an external perspective. BCCS will perform a vulnerability assessment of Customer systems and networks including web sites, servers, firewalls, switches, and routers from the outside world.	Per device	\$100.00
<b>Modem Scan</b>	An evaluation of the Customer's telephone system. BCCS will perform a dial-up assessment to detect the presence of unauthorized modems.	Per line	TBD
<b>Wireless Access Scan</b>	An evaluation of the Customer's wireless access network. BCCS will perform a wireless assessment to detect the presence of wireless devices. BCCS will verify that wireless devices meet the Customer's wireless security policies and standards.	Per building	\$100.00
